## ALIEN G9

Better than G8?

S\$99, [www.leapfroglobal.net](http://www.leapfroglobal.net)

A fraction of a second. To serious gamers, that may be the difference between winning or losing. Quick responses, even faster reflexes - skill is an integral part, but any real gamer will tell you that the gear is equally important.

The Alien G9 is a gaming mouse from Powerlogic that is catered to those looking for the best performance. The Alien G9 sports a sharp, chiselled black exterior that is accented by a silver mouse-wheel and 8 diagonal LED lights that pulsate and can change colour.

Underneath the G9's fearsome appearance lies a myriad of features that gamers will appreciate. The mouse features a solid construction meant for right-handers. There are a total of 9 programmable buttons offering gamers the ultimate freedom when it comes to configuring their interface. The G9 also allows gamers to modify its weight via magnetic weight cartridges. The Alien G9 may pack too many features for non-gamers, but gamers will definitely appreciate what it has to offer. **AK**

### SPECIFICATIONS:

RESOLUTION 800 - 6000 DPI configurable  
COMPATIBILITY Windows XP/Vista/7  
WEIGHT Cartridge with 9 weight adjustment levels

LOVE LED lights that make the G9 look like a futuristic weapon.  
HATE Lefties won't be able to use the mouse properly.  
WE SAY The G9 will make you as deadly as it looks.

### The details

#### 1 CUSTOMIZABLE

Everything on the G9 is customizable, from the weight of the mouse to its 9 programmable buttons.

#### 2 EYE-CATCHING

The Alien G9's LED lights can switch between millions of colours to suit your mood.

#### 3 DURABLE

Quality parts and a durable build ensure that the G9 will survive even the most heated gaming sessions.

### The details

#### 1 DESIGN

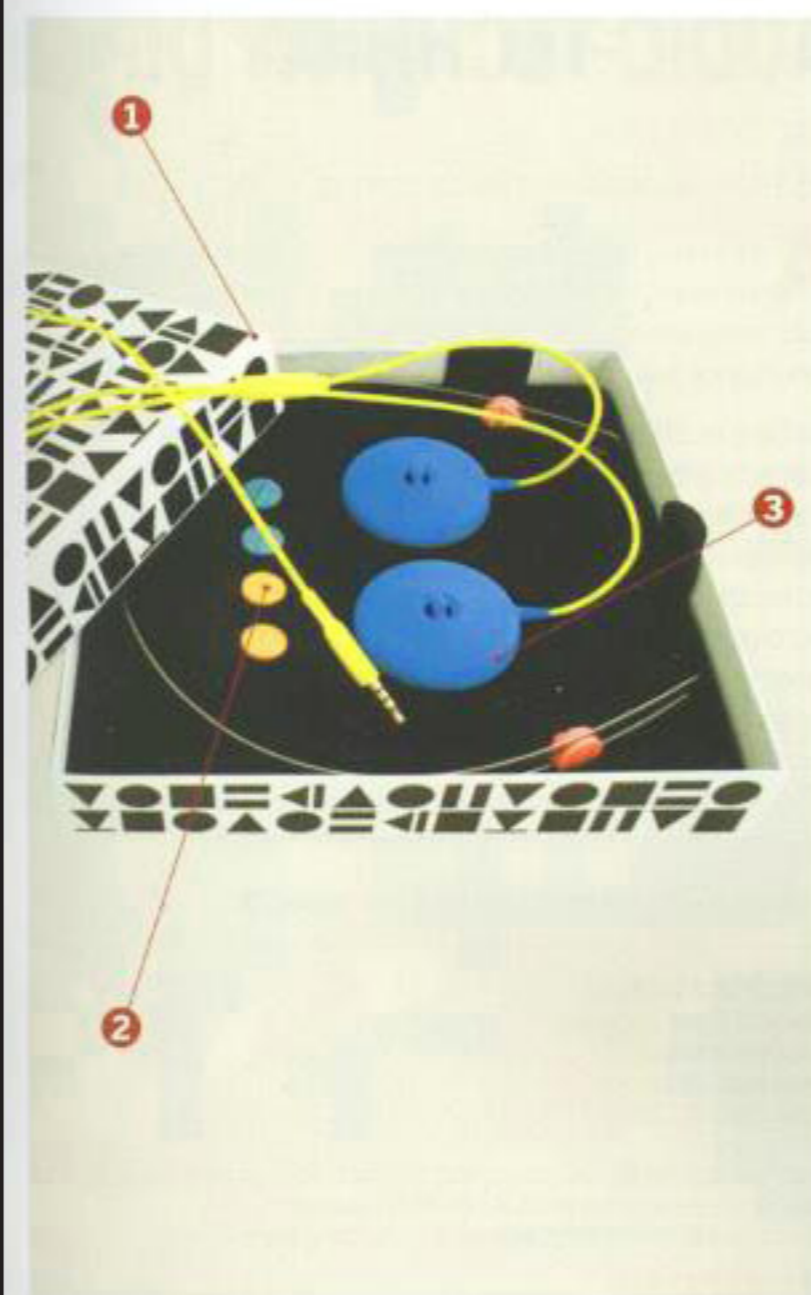

Funky, fun and retro inspired. Outstanding design mashed with great function.

#### 2 DIY

Simple user assembly is required. Assembly is extremely simple and only takes a moment.

#### 3 COMPATIBILITY

Works great with all things Apple.

## AIAIAI TRACKS

Top of the Pops.

S\$139.90, [www.aiaiai.dk](http://www.aiaiai.dk)

Designed in Denmark by a firm called Kilo Design, the AIAIAI Tracks Headphone with Mic is a great example of where form meets function. Construction is first class. Cables, plug and even the ear cups exude quality. Coupled with its simple and yet stylish lines, eclectic range of colours to choose from; these headphones are simply pure eye candy. Each set comes with different coloured sliders which allow you to subtly change the look of the headphones if you so desire. Also included in the retail package is a cute little baggie to stash these headphones. Equipped with 40mm drivers in an open can configuration, the AIAIAI Tracks' performance is excellent. Unlike most headphones, this pair isn't afraid of you dialing up the volume. Even at the highest volumes, it exhibits minimal to no distortion. The remote control behaves exactly like the stock Apple earbuds that come with the iPhone and is also compatible with iPods and Apple computers. If you are looking for a pair of headphones that look good, sound great and functions seamlessly with your iPhone, picking this up is a no-brainer. **QL**

### SPECIFICATIONS:

DRIVER 40mm  
IMPEDANCE 32 ohms  
FREQUENCY RESPONSE 20 - 20,000Hz  
SPEAKER SENSITIVITY 112 +/- 3db

LOVE Almost everything! But special mention to the comfort donning these headphones.

HATE Being open cans, listening at high volumes result in sound leakage.

WE SAY Handsome looks, great sound quality and a fantastic choice for anyone.
